

HIPPA Fax-to-Email

Windstream HIPAA Fax-to-Email allows you to leverage the advantage of mobility to send and receive faxes online through a process that enables covered entities to comply with the privacy regulations of the Health Insurance Portability and Accountability Act (HIPAA).

With Fax-to-Email you can access faxes anywhere using your email account— on devices such as PC's, laptops and hand-helds. With this service there is no need for a fax machine, ink or even paper!

FEATURES & BENEFITS

- Data security and privacy compliance
 - Transmissions can be encrypted in various formats for protection of sensitive data
 - Internet based fax allows for an audit trail of incoming/ outbound transmission, viewable online or via email faxes and confirmation.
 - Multi-level administrator and user system architecture results in access rights and username/ password authentication.
 - Online fax eliminates the archaic, publically accessible “fax room”, instead transmitting data directly to intended recipients
- Infrastructure, performance and redundancy
 - 99.9% uptime
 - Improve Security
 - Streamline administration
 - Multi-level user authentication
 - Implement scalable, high fax page volume
- Customer considerations
 - Reduce total cost of ownership
 - Eradicate hardware reliance
 - Enables HIPAA Compliance
- Capital and operational procurement by expanding tracking and reporting on usage

PLAN	HIPAA FAX
