

Internet Security

McAfee Multi Access makes it easy to protect your identity and data on your business devices. The multi-layered technology delivers the protection you need to work safely from security threats such as viruses, malware and more. And it allows a combination of devices to be managed all from one account- wherever you connect.

FEATURES

- One subscription covers up to 3 devices including your PCs, Macs, smartphones (Android and iOS), and tablets
- Easily block website categories such as social media, gambling and music stream sites or block specific URLs
- Quickly and easily log in to sites, apps, and more using facial recognition and your trusted devices

BENEFITS

- Keep your identity and devices secure against the latest viruses, malware, and online threats
- Anti-Spam blocks dangerous messages before they reach your inbox by removing emails that may include risky links and viruses
- Stops hackers and thieves, phishing, and email scams
